PROFILE

Analytical and detail-driven AI Data Analyst with 4+ years of experience transforming complex data into actionable insights to improve business performance. Proficient in SQL, Python, Power BI, Azure cloud technologies and AI technologies. Demonstrated success in optimizing reporting workflows, automating processes, and enhancing data accuracy across cross-functional teams. Adept at leveraging machine learning data pipelines and real-time dashboards to drive data-informed decisions.

EXPERIENCE

TELUS Digital - AI - E-commerce Data Analyst
June 2025 - to date | Cracow, Poland

I contribute to the development of advanced AR/ML datasets supporting virtual try-on technology in the fashion and beauty sector. I collaborate with product and UX teams to refine data labeling methodologies, leading to improved model precision and reliability.

By streamlining feedback loops between annotation and engineering teams, I've enhanced operational consistency and reduced error rates directly strengthening the performance of consumer-facing applications

HCL Tech - Data Analyst AR/ML
January 2025 - June 2025 | Cracow, Poland

As an AR/ML analyst, I managed end-to-end data annotation and analytics workflows powering predictive automation solutions. I optimized Azure-based pipelines and introduced Python-driven automation, increasing reporting efficiency by 30%.

My collaboration with cross-functional teams helped resolve data inconsistencies and workflow challenges, enabling smoother deployment of machine learning models and ensuring higher operational reliability

Genpact - Process Associate & Lean Ambassador
April 2021 - March 2024 | Cracow, Poland

At Genpact, I led initiatives focused on process optimization and automation, achieving over 200 hours in annual time savings through Python and VBA scripting.

As a Lean Ambassador, I standardized procedures across teams, increasing productivity by 15%. I also developed real-time dashboards to monitor service performance and data accuracy, enabling proactive issue resolution that improved client satisfaction.

INTERNSHIP

Codecool & LTIMindtree - Azure Monitoring & Automation Engineer
May 2024 - July 2024 | Cracow, Poland

During my internship at Codecool, I supported DevOps teams by implementing automated monitoring and alert systems using Azure Monitor, Logic Apps, and PowerShell.

My work improved system reliability and incident response times by enhancing visibility and refining escalation workflows — ultimately contributing to a more resilient infrastructure.

SKILLS/TECH-STACK

Languages & Tools: SQL, Python, Power BI, VBA, Snowflake, Git

Cloud & Automation: Microsoft Azure, Power Automate, Azure Monitor

Data Ops: Data Labeling, Quality Assurance, Reporting Automation

Methodologies: Agile, Lean Six Sigma, DevOps

Other: Jira, Zendesk, Cross-functional Collaboration, Process Optimization

CERTIFICATIONS & COURSES

Microsoft Azure Fundamentals – 2024

Generative AI – 2024

Python & App Development – Goldman Sachs, 2024

LANGUAGES

English - Native
Polish - Basic
Mandarin - Basic

EDUCATION

Master's in international business management
Akademe WSB
October 2024 - to date | Cracow, Poland

UNESCO Fellowship Biomedical Engineering
AGH University of Science and Technology
April 2020 | Cracow, Poland

MPhil Drug Discovery and Toxicology
University of Cape Coast
March 2020 | Cape Coast, Ghana

PERSONAL PROJECTS

- Created Power BI dashboards with Azure Text Analytics to visualize sentiment trends in customer feedback.
- Built server-side automation for real-time log monitoring using Linux scripts and dashboards.
- Prototyped AI-driven tools integrating Azure Vision, Speech, and Language APIs to optimize team work
